NOTES:
*1 The anti-theft module is located just above hood release cable in the
drivers kick panel. Other wires at the anti-theft module are:
12V-white/red, ignition-green, ground-black, left door pin-gray/red, right
door pin-blue, panic(horn and high beam)-yellow/green.
*2 There are two (2) red/blue wires in the ignition harness, one is for
parking lights and the other is for the right headlight.
*3 The auto-down module is in the drivers door just below the door open
lever.
*4 If not equipped with an anti-theft module, the red wire is located in a
harness at the left trunk hinge.
*5 When doing remote start, this wire must be isolated from the keyswitch
with the accessory relay.
